

Elite Cabinetry

Come Experience the Difference

Elite Cabinetry opened their showroom in La Quinta back in November of 2018. The community welcomed the new business and the response was overwhelming. From the start it was a very positive experience. It is a quiet place to look around, familiarize yourself with the products, and plan your design in a relaxed creative environment.

Elite Cabinetry's beginnings date back to 1978, when owner Brian Beavers started working as a cabinetmaker and learning the trade. After becoming a skilled craftsman, he helped produce and install high end custom cabinetry in many Los Angeles area businesses and residences. Since May of 1985, Brian and his wife Pam have owned and operated Elite Builders, specializing in complete home remodeling. After relocating to the Coachella Valley in 1992, they continued their home remodeling business, putting an emphasis on kitchen and bathroom spaces.

Elite Cabinetry provides a full scope of services from start to finish for your remodeling project, including new cabinetry, cabinet refacing and refinishing, painting cabinets, countertops, hardware, decorative tile, flooring and other home renovation projects. Their cabinet designers can create the kitchen and bathroom both flattering and functional to your own individual style while working with architects, designers, contractors, and homeowners themselves. They will come to your home to measure and at that time they will consult with you and your ideas to put together a detailed list for your design.

Elite Cabinetry emphasizes complete customer service from start to finish of every project they do. This is achieved by listening to the

specific needs of each client, direct communication, staying on budget, being prompt, and leaving a clean work area at the end of each day. They feel satisfaction when their services are completed as promised and they see the same satisfaction in their client's eyes.

Elite Cabinetry is committed to customer service, which is an essential element to making each project an effortless personalized experience. Better customer service was the basis for deciding to open the showroom. They wanted a physical storefront where their perspective clients could come

in, leisurely browse, and gain knowledge for their future projects. The ability to interact with clients on a personal level while offering them suggestions and solutions, is a vital part of the process in making their dreams become a reality.

'We are excited about this new venture.

It gives us the opportunity to serve residents of the Coachella Valley for many years to come''.
