CVWD Announces *New Rebates* for Washing Machines, Hot Water Pumps

By the Coachella Valley Water District

Coachella Valley Water District (CVWD) is offering two new water efficiency rebates for residential customers who install a new high-efficiency (HE) washing machine or a hot water recirculating pump in their home.

HE Washing Machines

HE washing machines can use about 25% less energy and 33% less water than regular machines. Qualifying washing machines must be Energy Star Certified HE models with a Water Factor of 4.5 or less. Eligible machines are listed at www.energystar.gov.

CVWD will offer a maximum of $150 rebate per installed HE washing machine.

The rebate is limited to one per household for a single-family home or one rebate application per unit for a multifamily dwelling duplex, triplex or fourplex.

Recirculating Pumps

Hot water recirculating pumps save water and energy by reducing the wait time for hot water to arrive at the faucet or shower. The compact devices return unused hot water back to the water heater.

CVWD will offer a maximum $125 rebate, or the cost of the installed pump, whichever is less. The rebate is limited to one per household for a
